The MCS-Series is engineered to conserve valuable process water while protecting costly equipment from debris. It offers minimal purge volumes in fresh water applications, allowing you to save on the cost of make up liquids, chemical treatment and heating energy.

Featuring fast cleaning magnetically coupled actuation, this design offers an optimized configuration to help improve and reduce costly maintenance and downtime. In addition, this actuation method eliminates the need for cover thru-holes and their associated seals.

TYPICAL APPLICATIONS

- paper coatings pcc/gcc slurries phenolic resins petroleum based greases ethanol processing
- cip fluids (sodium hydroxide) hot fry oils starch lime slurries curtain coaters nutricuticals
- machining coolants adhesives paint ink chocolate edible oils detergents tallow

The actuation piston and cleaning disc are coupled by powerful rare earth magnets—a simple design that delivers tremendous benefits by eliminating the need for shaft or external drive seals
